

# Getac product customisation and enhancements by SST

**Some examples of the modifications and enhancements to Getac products and Getac-based systems produced by SST.**

## TEMPEST

TEMPEST versions of the M230 and 9213 notebooks for deployment into sensitive areas to ensure security (SDIP-27 and NSTISSAM/1-92)

## Interface and Port modification

Enable deployment of Getac products with interfaces fit-for-purpose – e.g. modified USB, token reader, Fibre Ethernet or Serial communications for crypto and satellite integration.

# Getac product customisation and enhancements by SST

## System Integration

Getac products integrated into custom systems including sealed interfaces, secure communications, encryption, enhanced security and connectivity.

## Custom developments

SST has demonstrable expertise in Getac product enhancement using in-house 3D CAD modelling and rapid prototyping techniques. All this from a Government accredited secure site with security cleared personnel, crypto integration and test facilities.
