

Secure Systems & Technologies (SST) is your one-stop solution provider, manufacturer and service partner, where data security is paramount, whether in the office or in the most demanding of environments. Whenever you have requirements for special environmental or security considerations to be met, SST can accommodate, either from its extensive range of standard products or through the provision of customized engineering solutions. With many years of experience in communications security, encryption, EMC, harsh or constrained environments and TEMPEST, SST is your partner of choice. Located in a state of the art, purpose built facility in Gloucester, England, research and development, manufacture and testing resources are combined, further improving efficiency and reducing the time between conception and deployment.

Security Enhancements: SST works closely with security product companies to ensure seamless integration of approved encryption and security capabilities into its product range. Secure memory devices, Smart Card Readers, Secure KVM Switches, Fibre Isolation Switches, disk encryption software and encrypted disk modules have been tested and proven in many customer applications.

TEMPEST: SST, in partnership with global market leaders, provide value-engineered TEMPEST solutions, based on commercial off-the-shelf (COTS) products. Owing to our strategic partnerships we are able to offer the latest range of servers, personal computers, notebooks and mobile equipment backed by the resources of these major Original Equipment Manufacturers (OEM's) and built by us to the specific configurations preferred by the information security community. To complete the range SST offers a range of monitors, printers and scanners, as well as communications modules such as routers, hubs and switches.

Standard	Full	Intermediate	Tactical

TEMPEST PRODUCTS

**SECURE PRODUCTS FOR A
 MORE SECURE WORLD**

Computing

SST provides a complete range of computing solutions to suit any operating environment.

PCs include the hugely expandable SC2800 PC, the extremely powerful SC2900 workstation and the small form factor SC7800.

Designed to meet more specific needs, from the elegant all-in-one SC1000 to the completely sealed, robust SC800 immune to sand, dust, high temperature and humidity, SST offers a wide range of products to meet your requirements.

The extensive Thin Client range ensures secure computing based on industry standard platforms.

Displays

Standard Displays range from 19" to 24" Widescreen, with some larger TEMPEST displays for briefings, video conferencing and Geographical Information Systems ranging up to 50".

Imaging & Printing

Selected from best of breed products, SST provides a full range of scan and print solutions.

From small mobile printers and scanners for mobile offices, through personal and workgroup mono and colour printing right up to large format colour printing for effective display of large amounts of detail.

Some options include full IPSEC implementation on fibre optic network ports and enhanced security using network access control devices.

Mobile Computing

Particularly known for its expertise in producing mobile TEMPEST solutions, SST provides a large range of mobile products suitable for the target environment.

From the fully featured SN6730 for 'mobile office' use through to the fully rugged MIL-STD-810F TEMPEST laptop suitable for deployment in any environment.

SST also provides case-based solutions incorporating TEMPEST items and including multi-bearer communication, crypto provision and power management for immediate deployment around the world.

Communications

Securely connecting people and TEMPEST resources, SST has the expertise.

TEMPEST VoIP telephones, secure faxes and video conferencing, networks for the office or deployed environments, routers, secure remote access solutions, satellite and crypto interfaces all combine to ensure that our customers stay connected.

Enclosures

Compact solutions include the SE500 to house USB devices, through desktop expansion options and crypto housings.

On a larger scale, SST manufacture 10U deployable cases enabling secure 'plug and play' communications and assured interfacing, right up to fully TEMPEST assured solutions in a 42U rack.

SST also provides a range of integration, documentation and test services including formal testing of a configured system to SDIP-27 Level A, ensuring the customer receives a fully integrated, working, tested and documented system with appropriate compliances ready to be switched on and perform its desired function.
